

PDF according to the Medibel+ norms

The Medibel standard must be chosen according to the target medium («Newspaper - NoDoG» or «Magazine» quality)

For more information regarding the Medibel+ technical norms

- Check our web site <http://premedia.rossel.be>
you will find the last technical description of the Medibel norms, as well as the required job options and Pitstop profiles.
- Check the official "Medibel+" site <http://www.medibelplus.be>
- Feel free to phone if you need some help: + 32 2 225 5481

ICC - standards Medibel : ISOCoated (_IC) et ISOnewspaper26v4 (_INP)

We recommend the use of profile IsoCoatedv2

If you use the ICC profile «IsoCoatedv2», the name of the file must be : **ddmmyy_TIT_custom_IWC.pdf**

ddmmyy = day/month/year of parution

TIT = title of publication

custom = subject

IsoNewspaper26v4 | alternately, you could use the icc profile «IsoNewspaper26v4», it is then necessary to add «INP» in the name of the file (in order to guarantee a printed quality). Example : **ddmmyy_TIT_custom_INP.pdf**.

Check the official "Medibel+" site <http://www.medibelplus.be>
